Glossary of Project Financing Statistics

Period: Data will be collected and published in 6-months period (end of December and June) in each year.

Definiton of Project Financing: Project financing is the creation of revocable or irrevocable funding resource in order to finance the long term projects-that can be classified economically- where the providers make their decisions based upon the projected cash flows and assets of the project.

Following considerations are taken into account while classifying "project financing loans" are

1. Project credits, i.e. creating a new economic capacity (greenfield investments) and/or increasing the current economic capacities (capacity building, expansion investments) and/or financing the acquisition and privatization, are included in this report.

project loan.

3."Total commitment" means in this report is the maximum amount of risk taken by the bank, if the cash and non-cash loans are both given for the same project.

4. As of allocation date, all project loans exceeds USD 20 million and have a maturity of minimum 5 year will be included in this report, ignoring the owner of the loans extended.

5. Only the projects that are included in Turkish balance-sheets are taken into consideration in this report.

Following classification is used in sectoral distribution of project finance statistics.

1. Energy: The production, transmission and distribution of energy resources (electricity, oil, coal, natural gas, water, etc.) (including all thermal and renewable projects); the acquisition and privatization of energy projects.

2. Infrastructure: Transportation projects (such as roads, bridges, highways, ports, airports); infrastructure projects of provincial administrations (water, sewage systems); projects taken with public and private partners (PPP projects, for example hospital projects); communication and telecommunication projects.

3. Real estate: Hotel, shopping mall, residential and office projects.

4. Other: Projects other than listed above (Merge and acquisition transactions and restructured financing, etc.)

Risk (balance): Refers to the risk balance as of report date.

Unit: "Buying" exchange rate of the Central Bank

This report is prepared from the related statistics of member banks that provide project financing. Whilst every effort has been made to ensure that the information contained in this report is correct, the Banks Association of Turkey can not accept any responsibility for any errors or omissions or for any consequences resulting therefrom.
