

The future of financial supervision in the European Community and other recent regulatory developments

Vasilis Panagiotidis
Special Advisor

10th IFBA meeting
October 2009

Based on Professor Christos Gortsos Lecture
at the Santorini Conference, July 2009

TABLE OF CONTENTS

- I.** The existing framework for the exercise of supervision in the European financial system and the need to re-adjust it
- II.** The two proposals of the “de Larosière Report” on re-adjusting the existing framework for the exercise of supervision in the European financial system: an overall examination
- III.** The two stages for establishing the European System of Financial Supervision (ESFS)
- IV.** The two European “bodies” proposed to be established
- V.** Post-script: current EU developments in the field of financial regulation and the rescue – recovery programmes
- VI.** Other recent regulatory developments – The G-20 Pittsburgh Summit and launch of SEPA Direct Debit Schemes

I. The existing framework for the exercise of supervision in the European financial system and the need to re-adjust it

A. Some basic assumptions

1. The view that the current financial system functions without the existence of a regulatory or supervisory framework – or that it is self-supervised – does not correspond to the reality
2. The neoclassical model on which the modern financial system is based incorporates the possibility of market failures, in particular:
 - the existence of information asymmetry, and
 - the occurrence of negative externalities

The objective of regulatory intervention is to address them

3. The process of “de-regulation” was about the abolishment of restrictive measures in the operation of financial systems, mainly connected with state intervention for the allocation of borrowed funds

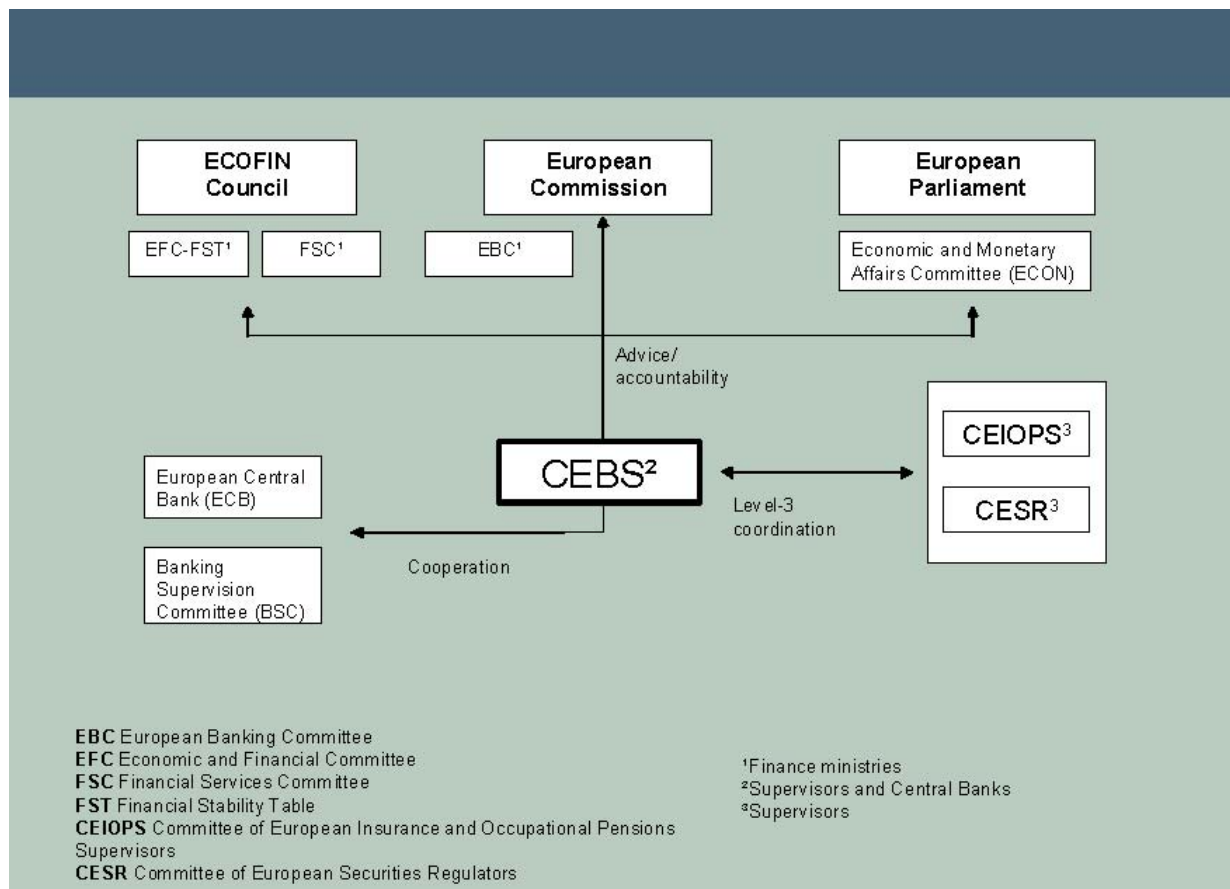

A. Some basic assumptions

4. In all market-based economies the existing regulatory framework for the financial system consists of rules that seek to ensure the following policy goals:
 - Ensuring the stability of the financial system, its sectors and infrastructures (banking sector – capital markets – insurance sector – payment and settlement systems)
 - Ensuring the effectiveness of capital markets and investor protection
 - Ensuring the effectiveness of payment systems
 - Ensuring the protection of consumers of financial services
 - Combating the commitment of crime within the financial system
5. Offshore financial centers constitute the exemption allowing for regulatory arbitrage

B. The existing European architecture of the monetary and financial system

- 1. European monetary system:** regional monetary union – single monetary policy and use of a single currency
- 2. European financial system – architecture in the course of financial integration**
 - 2.1 Institutional framework:** three categories of legal acts in the law-adoption process (Lamfalussy process)
 - basic legal acts (Co-decision procedure: European Parliament – Council (mainly EcoFin))
 - implementing measures (European Commission with the assistance of “regulatory committees” and “pan-european networks with the participation of sectoral supervisory authorities” (CEBS – CESR – CEIOPS), see below the diagram)
 - Soft law rules: CEBS – CESR – CEIOPS

The European financial regulatory/supervisory structure

B. The existing European architecture of the monetary and financial system

2. European financial system (cont.)

2.2 Supervisory framework

- absence of supranational, pan-European supervisory authorities even after the establishment of the EMU (Treaty, article 105, para. 5)
- each member state is free to determine the institutional structure of its domestic financial supervisory framework
- EU rules on the division of responsibilities between national competent authorities with regard to foreign branches
- EU rules on the consolidated supervision of foreign subsidiaries
- EU rules on consolidated supervision of “financial conglomerates”
- EU rules on cooperation between national competent authorities

B. The existing European architecture of the monetary and financial system

2. European financial system (cont.)

2.3 Regulatory framework:

2.3.1 Structured system of rules of (mainly hard but also soft) European financial law with respect to all the above-mentioned (page 5) policy goals of regulatory intervention within the process of financial integration

2.3.2 Significant influence by international financial standards, mainly those produced by:

- the Basel Committee (BCBS),
- the FATF, and
- the IASB

C. Towards a new supervisory framework

1. The option of creating a supranational, pan-European financial supervisory system

The main argument in favor of such a structure, which has been discussed heavily especially after the establishment of the EMU

It represents one of the options to effectively supervise and regulate pan-European, “systemically important” financial conglomerates, due to the threats they are posing to the stability of the European financial system

C. Towards a new supervisory framework

1. The option of creating a supranational, pan-European financial supervisory system (cont.)

Two main alternatives (taking as a starting point the current structure of European financial law):

- establish a “European System of Financial Supervisors” (see below under 2), or
- activate para. 6 of article 105 of the Treaty, according to which the ECB could become, even though under constraints, a European financial supervisory authority (see below under 3).

C. Towards a new supervisory framework

1. The option of creating a supranational, pan-European financial supervisory system (cont.)

In principle, in either case the following eight (8) issues need to be addressed:

- the necessary extent of amendments of the Treaty,
- the institutional structure of the system,
- the material coverage of its supervisory powers in the financial system (banking sector – capital markets sector – insurance sector),
- the personal coverage of its powers (which categories of financial firms and groups would be subject to supervision and by whom),

C. Towards a new supervisory framework

1. The option of creating a single supranational, European financial supervisory system (cont.)

- the extent of its regulatory powers,
- its decision-making bodies, their composition and their competences,
- the independence of its constituents, the decision-making bodies and the persons appointed therein, and
- its overall embedment within the existing institutional structure of the European Union/Community.

C. Towards a new supervisory framework

2. The establishment of a “European System of Financial Supervisors” – outside the European Central Bank

General assessment:

- a legally demanding and time consuming option,
- but still a more straightforward solution for the effective supervision of European financial conglomerates (under current Treaty provisions – article 105.6)

C. Towards a new supervisory framework

2. The establishment of a “European System of Financial Supervisors” – outside the European Central Bank (cont.)

Three options:

- three authorities (“sectoral approach”) based on the existing three so-called “Level 3 Committees” (i.e., CEBS, CESR and CEIOPS) established by the Commission
- two authorities (“twin peaks approach”)
- one authority (“consolidation approach”)

C. Towards a new supervisory framework

3. Assigning the task of financial supervision to the ECB:

General assessment:

- it **renders the exercise simpler** with respect to the majority of the abovementioned questions, since its powers in the field of financial supervision would be embedded within the existing structure and institutional setting of the ESCB.
- the relevant decision by the EcoFin Council could be taken within a definitively **shorter time horizon** than if the decision would be taken to create a European System of Financial Supervisors.

C. Towards a new supervisory framework

3. Assigning the task of financial supervision to the ECB (cont.)

General assessment:

- upon activation of art. 105, para. 6 of the Treaty (which requires *a unanimous decision by the EcoFin Council*), **the ECB could only become a “sectoral supervisory authority”**, since *insurance undertakings are explicitly excluded*,
- a decision should be taken in this case as well with regard to the **range of financial firms and groups which would be subject to the supervision of the ECB** and those who should continue to be supervised by the national competent authorities.

C. Towards a new supervisory framework

3. Assigning the task of financial supervision to the ECB (cont.)

General assessment:

- need to consider the approach according to which **conflicts arise if a monetary authority is also, concurrently, a financial supervisor,**
- need to **reconcile the supervisory powers of the ECB with those of the national supervisory authorities,** especially in the case of the member states (which are now the majority within the EU) **which have adopted the “integrated approach”.**

C. Towards a new supervisory framework

D. The impact of the current crisis

1. New discussions on the need to establish pan-european supervisory authorities for the financial system
2. Supervision has two dimensions:
 - macro-prudential (the one mostly neglected)
 - micro-prudential
3. The European Commission assigns the task of submitting proposals to the “de Larosière Group”

II. The two proposals of the “de Larosière Report” on re-adjusting the existing framework for the exercise of supervision in the European financial system: an overall examination

THE DE LAROSIERE PROPOSALS (1)

I. The short term proposal

Two (2) components:

- A. Strengthening of the quality of supervision exercised at European level – Creation of a "European system of supervision and crisis management"
- B. Strengthening of the quality of supervision exercised by national supervisory authorities

THE DE LAROSIERE PROPOSALS (2)

A. Strengthening of the quality of supervision exercised at European level – Creation of a "European system of supervision and crisis management"

Two (2) parts:

1. **European system of supervision**
2. European system of crisis management: Strengthening the regulatory framework governing the reorganisation and winding-up of credit institutions

THE DE LAROSIERE PROPOSALS (3)

1. European system of supervision

Establishment of two (2) European bodies:

(a) The European Systemic Risk Council (**ESRC**): a body for “macro-prudential supervision” (*immediately*)

i. Proposal for a Regulation of the European Parliament and of the Council “*on Community macro prudential oversight of the financial system and establishing a European Systemic Risk Board*”, (COM (2009) 499 final, 23.9.2009).

ii. Proposal for a Council Decision “*entrusting the European Central Bank with specific tasks concerning the functioning of the European Systemic Risk Board*”, (COM (2009) 500 final, 23.9.2009).

THE DE LAROSIERE PROPOSALS (3)

1. European system of supervision (con.)

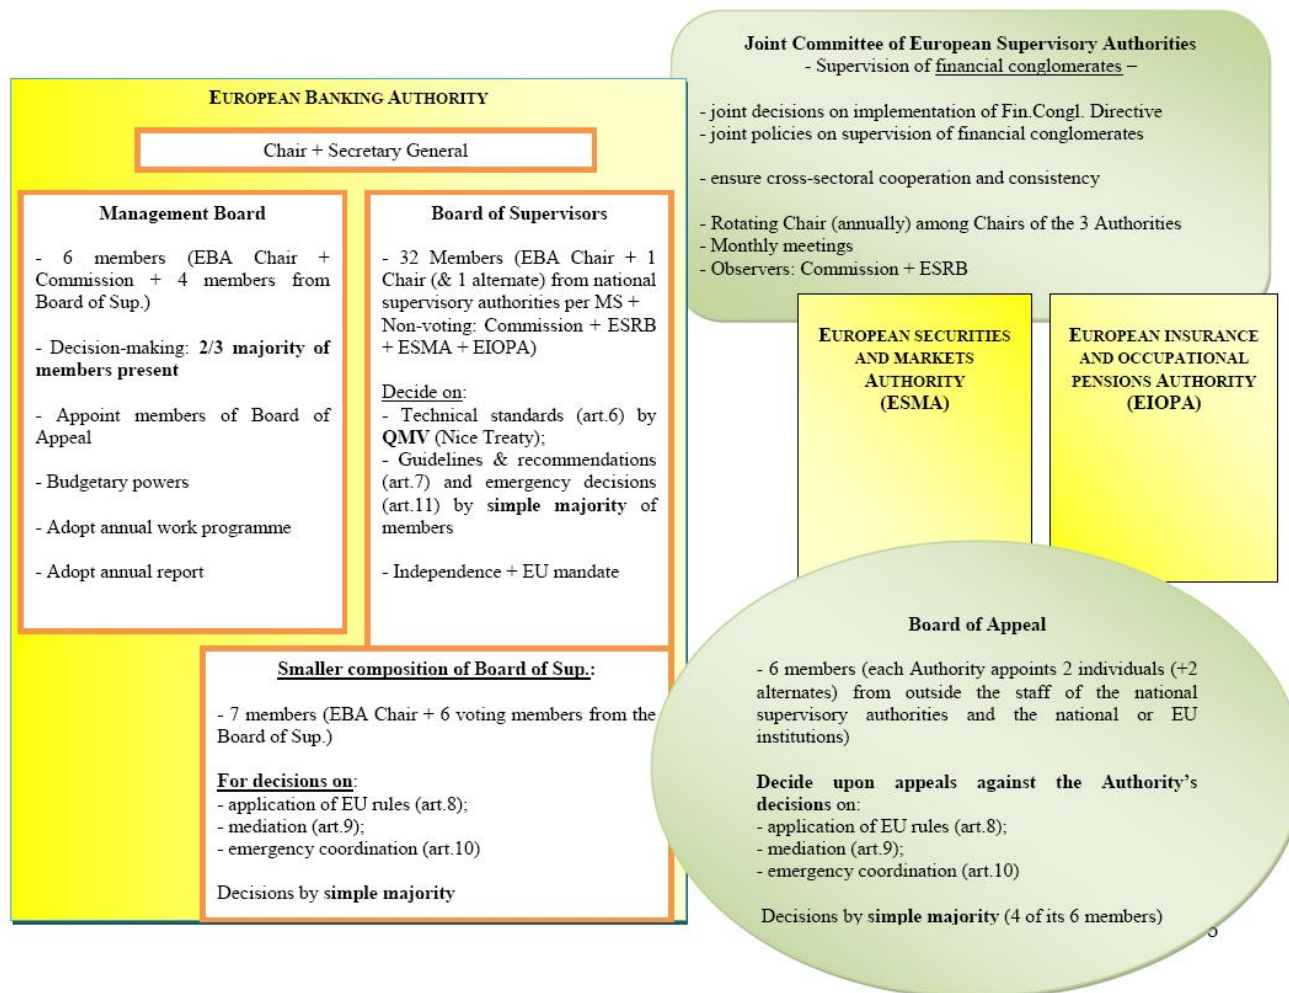

Establishment of two (2) European bodies:

(b) European System of Financial Supervision (**ESFS**) a body for the “micro-prudential supervision” based on the operation of three European Authorities (*in two stages – see below page 29*):

- **European Banking Authority**

Proposal for a Regulation of the European Parliament and of the Council “establishing a European Banking Authority”, (COM (2009) 501 final, 23.9.2009).

THE EBA COMPOSITION

THE DE LAROSIERE PROPOSALS (3)

1. European system of supervision (con.)

- **European Securities Authority**

Proposal for a Regulation of the European Parliament and of the Council “*establishing a European Securities and Markets Authority*”, (COM (2009) 503 final, 23.9.2009)

- **European Insurance Authority**

Proposal for a Regulation of the European Parliament and of the Council “*establishing a European Insurance and Occupational Pensions Authority*”, (COM (2009) 502 final, 23.9.2009)

THE DE LAROSIERE PROPOSALS (4)

II. The long term proposal:

Establishment of two (2) European Authorities for micro-prudential supervision

- one Authority **responsible for banking and insurance prudential supervision issues**, as well as any other issue which is relevant for financial stability
- one Authority **responsible for conduct of business and market issues, horizontally** across the entire financial system

III. The two stages for establishing the European System of Financial Supervision (ESFS)

III. The two stages

1. Initiatives on strengthening supervision at **national** level
2. Initiatives regarding the strengthening of level 3 Committees (CEBS-CESR-CEIOPS)
 - 2.1 Strengthening the budget
 - 2.2 Full development of the “peer review process”
 - 2.3 Strengthening the duties
 - 2.4 Establishing the principle of qualified majority and further strengthening of cooperation
 - 2.5 Preserving the independence of the new Authorities building upon the existing 3L3 Committees
3. Initiatives in relation to the other components for ensuring stability of the financial system
 - 3.1 Strengthening the degree of harmonization of rules according to which regulatory intervention is exercised in the financial system
 - 3.2 Strengthening risk management mechanisms

IV. The two European “bodies” proposed to be established

The two European bodies

A. Macro-prudential supervision: The tasks of the European Systemic Risk Council (ESRC)

1. *Allocation of tasks and the conditions for their effective performance*
2. *Ensuring a proper flow of information between the ESRC and national supervisors*
3. *Macro-prudential warning mechanisms*
 - 3.1 *Actions taken when risks are detected*
 - 3.2 *Actions taken when serious risks are detected*

The two European bodies

B. Micro-prudential supervision: The tasks of the European System of Financial Supervision (ESFS)

1. *Tasks in relation to systemically important, cross-border financial service suppliers*
2. *Tasks in relation to specific EU-wide institutions*
3. *Tasks in relation to regulatory intervention rules*
4. *Tasks in relation to supervisory standards and practices*
5. *Tasks in relation to macro-prudential supervision*
6. *Tasks in the area of crisis management*
7. *Tasks in relation to international matters*

V. Post-script: current EU developments in the field of financial regulation and the rescue - recovery programmes

A. Current EU developments in the field of financial regulation

- A. The main regulatory measures which have already been undertaken or are under preparation relate to the following issues:
1. **Enhancement of the capital requirements framework**
 - Proposal for a Directive of the European Parliament and of the Council amending Directives 2006/48/EC and 2006/49/EC as regards **banks affiliated to central institutions, certain own funds items, large exposures, supervisory arrangements, and crisis management** (COM (2008) 602 final, 1.10.2008)
 - Proposal for a Directive of the European Parliament and of the Council amending Directives 2006/48/EC and 2006/49/EC as regards **capital requirements for the trading book and for re-securitisations, and the supervisory review of remuneration policies** (COM (2009) 362 final, 13.7.2009)

A. Current EU developments in the field of financial regulation (con.)

2. Review of deposit guarantee schemes

Directive 2009/14/EC of the European Parliament and of the Council of 11 March 2009 amending Directive 94/19/EC on deposit-guarantee schemes as regards the coverage level and the payout delay (L 68,13.3.2009)

A Proposal for the amendment of the Directive 2009/14/EC is expected in December.

A. Current EU developments in the field of financial regulation (con.)

3. Enhancement of transparency in financial markets and securitization process

- **Committee of European Securities Regulators (2009):** *Measures adopted by CESR Members on short selling* (Regular updates since September 2008)
- **Committee of European Securities Regulators (2009):** *CESR Proposal for a Pan-European Short Selling Disclosure Regime*, Consultation paper, July,
- **European Commission (2009):** *Ensuring efficient, safe and sound derivatives markets*, Communication (COM (2009), 332 final, 3.7.2009)

A. Current EU developments in the field of financial regulation (con.)

3. Enhancement of transparency in financial markets and securitization process

- **European Commission (2009):** *Possible initiatives to enhance the resilience of OTC Derivatives Markets*, Consultation document, July
- **Committee of European Securities Regulators (2009):** *Trade repositories in the European Union*, Consultation paper, September
- Proposal for a Directive of the European Parliament and of the Council **amending Directives 2003/71/EC on the prospectus to be published when securities are offered to the public or admitted to trading and 2004/109/EC on the harmonisation of transparency requirements in relation to information about issuers whose securities are admitted to trading on a regulated market** (COM (2009) 491 final, 23.9.2009)

B. The rescue - recovery programmes

1. Differences in scope (rescue versus recovery)
2. The **main issues dealt with** in the rescue and recovery programmes:
 - the avoidance of undue distortions of competition, and
 - the avoidance of moral hazard
3. The main **points of criticism** to these programmes:
 - taxpayers are “footing the bill”,
 - slow implementation of the support measures,
 - the ongoing “credit squeeze”.
4. For an assessment of financial sector **rescue programmes** see Bank for International Settlements (BIS) Paper No 48, July 2009

VI. Other recent developments

A. THE PITTSBURGH SUMMIT 24-25.9.2009

1. **the G-20 role:** to be the **premier forum** for the international economic cooperation. Establishment of the Financial Stability Board (FSB) to include major emerging economies and welcome its efforts to coordinate and monitor progress in strengthening financial regulation (**Leaders' Statement**, Preamble, para. 19)
2. G-20 leaders call on their Finance Ministers and Central Bank Governors to reach agreement on an international framework of reform in the following critical areas (**Leaders' Statement**, main text, para. 14-16) :
 - *Building high quality capital and mitigating pro-cyclicalities* (aim of implementation by **end-2012**)
 - *Improving over-the-counter derivatives markets* (aim of implementation by **end-2012**)
 - *Addressing cross-border resolutions and systemically important financial institutions by **end-2010***
 - *international accounting bodies* to redouble their efforts to achieve a single set of high quality, global accounting standards within the context of their independent standard setting process (complete their convergence project by **June 2011**)

A. THE PITTSBURGH SUMMIT 24-25.9.2009 (con.)

- *Reforming compensation practices to support financial stability:*
 - (i) avoiding multi-year guaranteed bonuses
 - (ii) ensuring that compensation for senior executives and other employees having a material impact on the firm's risk exposure align with performance and risk;
 - (iii) making firms' compensation policies and structures transparent through disclosure requirements;
 - (iv) limiting variable compensation as a percentage of total net revenues when it is inconsistent with the maintenance of a sound capital base; and
 - (vi) ensuring that compensation committees overseeing compensation policies are able to act independently.

The FSB must monitor the implementation of FSB standards and propose additional measures as required by **March 2010**.

A. THE PITTSBURGH SUMMIT 24-25.9.2009 (con.)

- *fight non-cooperative jurisdictions (NCJs)* : to maintain the momentum in dealing with **tax havens, money laundering, proceeds of corruption, terrorist financing, and prudential standards**
 - (i) expansion of the Global Forum on Transparency and Exchange of Information, including the participation of developing countries. The main focus of the Forum's work will be to improve tax transparency.
 - (ii) the FATF to issue a public list of high risk jurisdictions by **February 2010**
 - (iii) the FSB to report progress to address NCJs with regards to international cooperation and information exchange in November 2009 and to initiate a peer review process by February 2010.

B. Launch of SEPA Direct Debit Schemes

- The European Payments Council (EPC) launches the SEPA Core Direct Debit Scheme and the SEPA Business to Business Direct Debit Scheme on **2 November 2009**
- From that point onwards banks will gradually roll out SEPA Direct Debit services
- On 2 November 2009 **2.607** payment service providers throughout the 32 countries that make up the Single Euro Payments Area (SEPA) – the 27 EU member states, Iceland, Liechtenstein, Norway, Switzerland and Monaco - will enable bank customers to make and receive both domestic and cross-border euro **Core** (B2C) direct debit payments
- On 2 November 2009 **2.366** payment service providers throughout the SEPA will enable bank customers to make and receive both domestic and cross-border euro **B2B** direct debit payments
